- Author Name
- Book Name
- Type
- Status
- Selling Units
- Net Earnings
- Date

Click Book → Show:

- Book ID
- Selling Units
- Net Earnings
- Launch Date

7 SELLING & FINANCIAL ENGINE

7.1 Selling Update

Admin updates:

- Platform Name
- Selling Units
- Product Link
- Rating

7.2 Financial Calculation Logic

Per Book:

Revenue = Selling Price × Units
Gross Margin = Revenue – Product Cost

Expenses:

- Ads Cost
- Platform Fees
- Returns & Exchanges fee

Net Profit = Gross Margin – Expenses

Author Royalty = Net Profit × Royalty %

Adjustments:

- Referral deduction
- Outstanding amount deduction

Final Royalty = Auto-calculated

7.3 Royalty Payment

Admin must:

- Select Author Bank Account
- Upload payment proof
- Update payment status

Confirmation email sent to:

- Author
- Super Admin

8 HELP CENTER (ADMIN)

8.1 Ticket System

Columns:

- Ticket ID
- Author Name
- Title
- Date & Time
- Status (Pending / Working / Solved)

8.2 Chat System

- Two-way messaging
- Attachment support
- No Web Socket required

9 ROLE & PERMISSION

- Super Admin creates Sub Admin
- Assign modules
- Super Admin has override control
- Audit logs required

10 AUTHOR MODULE

10.1 Author Registration

Fields:

- First Name
- Last Name
- Mobile (10 digits)
- Email
- Referral Code (Optional)

OTP verification required.

10.2 Password Rules

- Must include first name + 3 numbers
- Minimum 4 characters

10.3 Author Dashboard

Show:

- Profile details
- Net Royalty
- Total Books
- Ongoing Books
- Last Month Royalty

10.4 Book Submission (Author)

Same fields as admin book creation.

After payment:

- Publishing request sent to Admin
- Confirmation email sent after approval or decline

10.5 Books Listing (Author)

Columns:

- Book ID
- Name
- Status
- Selling Units
- Net Earnings
- Launch Date

Click → Show platform selling page (e.g., open product link in Amazon)

10.6 Royalty Page

Monthly Summary:

- Total Selling Units
- Net Royalty

- Payment Date

Detailed View:

- Book-wise royalty
- Platform-wise sales
- Payment proof
- Transaction ID

11 REFER & EARN

- Referral earning only after 100% payment completion
- Track:
    - Referred Author Name
    - User ID
    - Payment Status
    - Enrollment Date

Earnings Estimates:

- Available Balance
- Utilized Balance

Rating & Review Module

- Authors can provide ratings and write reviews about the platform.
- Reviews may include attachment support (documents or images).
- All submitted ratings and reviews will be publicly visible to users on the platform.
- The Super Admin has the authority to edit or delete any review when necessary.

12 BANK ACCOUNT MANAGEMENT (AUTHOR)

Author can:

- Add bank account
- Edit account
- Delete account

Fields:

- Bank Name
- Account Holder Name
- Account Number
- Re-enter Account Number
- IFSC Code
- Branch Name
- Account Type (Primary / Secondary)

Admin must select Primary account before releasing royalty.

13 SYSTEM NOTIFICATIONS

System must send notifications for:

- OTP verification
- Payment request
- Publishing approval/rejection
- Royalty release
- Selling update submission

Visitor and Clients Side Function Requirements

A functional and dynamic web site
Author listing page and filtration
Book Listing Page and filtration

14 NON-FUNCTIONAL REQUIREMENTS

- Role-based access control
- Audit logs for financial updates
- Dynamic dashboard response < 3 seconds
- File upload validation
- 99% uptime
- Scalable for 100,000+ authors

DEVELOPMENT NOTES

- All financial calculations must be backend controlled.
- No client-side royalty calculation.
- All actions must maintain audit logs.
- Payment records must be immutable after submission (only editable by Super Admin with audit trail).
- Date validations must prevent past launch dates.
